

The third Steering Committee and Partners Meeting has been held in Kavala (Greece) on 4th and 5th May 2010.

The first day was focused on the main findings and results of the Work Package 3 'Analysis of Military Brownfields' that represented the starting point of the specific technical activities of the project, consisting in: the setting up of a common methodological tools for the activities of the project, the realisation of a context and SWOT analysis and the assessment of the military brownfields suitable for starting the rehabilitation process. To this regard each project partner presented a mapping of the dismissed military brownfields in the areas of the project implementation.

The methodology and the next activities foreseen by the Work Package 4 'Tools to manage the Process F.A.T.E.', aimed at providing the regional and local administrations with useful tools and measures to manage the entire process of conversion, have been discussed during the second and last day of the meeting.

A Steering Committee and a Workshop about WP4 'Tools to manage the process FATE' will be held in Slovenia on [16th-17th November 2010](#), more detailed information will be given in the next months.
